DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12/4/06 has been entered.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12/4/06 has been considered and the previous indication of allowable subject matter stands.

Allowable Subject Matter

3. Claims 1-8 and 34-38 are allowed.
4. The following is an examiner's statement of reasons for allowance, previously presented in the office action mailed on 10/18/06:
5. As to claims 1 and 3, none of the prior art teach or fairly suggest the limitation of "representation of boundaries comprising **connected** reference vectors extending along said

Art Unit: 2624

boundaries”, in combination with the other limitations of the claims. The prior art of Tokita, already of record, discloses a representation of boundaries comprising reference vectors extending along said boundaries (Fig. 2 - 4, wherein the broadest reasonable interpretation of the claims limitation of “extending along the boundaries”, the prior art of Tokita discloses vectors extending along said boundaries in the (yj) direction, as seen in figures 2 and 4). However, Tokita does not teach or fairly suggest that representation of boundaries comprising **connected** reference vectors extending along said boundaries as disclosed in the limitations of claims 1 and 3.

6. As to claim 34 and as previously stated in the Office Action mailed on February 16, 2006, none of the prior art teach or fairly suggests the limitation of “a software candidate defect identifier operative to identify at least some candidate defects in the image, in software” in combination with the hardware defect identifier and other limitations of the claim. The prior art of Tokita discloses a system for image processing including a hardware candidate defect identifier operative to identify at least some candidate defects in the image, in hardware (column 4, lines 55-64 and Fig. 17, elements 9 and 10). However, Tokita does not teach or fairly suggest the limitation of a software candidate defect identifier as disclosed in claim 34.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
